

PRESS RELEASE

Lumberg Welcomes Ten New Trainees

Cloppenburg, 3.9.2014. For the training year which started only after the summer break, Lumberg welcomes ten new trainees, six of whom at the Group's largest production facility in Cloppenburg, and four at the company headquarters in Schalksmühle, in Germany's Sauerland region.

In Cloppenburg, Tobias Baier and Sascha Lüker will start their training to become an industrial mechanic, while Vanessa Pleye and Michael Mattke are training to become toolmakers, with Alex Mitjukow pursuing the occupational profile of a process mechanic, whereas Daniel Miller opted for a career as a mechatronics engineer.

Whereas the start into a professional life took place in Cloppenburg in Lower Saxony on August 1, the trainees in Schalksmühle received their warm welcome on August 18. For a knowledgeable and sound professional future, the trainees will go through a regular rotation system to acquaint themselves with the different fields, departments and locations, in line with their respective occupational profile. They will familiarize themselves with relevant matters that relate to the products made by Lumberg and learn about working in different team structures as well as the flows of a modern industrial operation.

About the Lumberg Group:

The Lumberg Group, headquartered in Schalksmühle, Germany, ranks among the leading providers of connector and interconnecting systems. Core areas of expertise include R&D, manufacturing and the worldwide sales of electromechanical and mechatronic components. For more than 80 years now, the Group's skills have broadened from manufacturing connectors and challenging micro-contact elements, to developing complex mechatronic assemblies, to customer-specific engineering and technical design services for all industries. In-depth application expertise led to strong partnerships in the automotive, home appliance, building technology, communications, consumer electronic and photovoltaic industries. Family-run in the third generation, the company has a global workforce of around 1,000. Subsidiaries in Europe, America and Asia form a dense sales network. In 2014, the Group's turnover totalled some Euro 115m. Over 20,000 catalogue and customized products are proof of the company's efficiency. www.lumberg.com
