

## PRESSEINFORMATION

### Lumberg Welcomes Six New Trainees

**Schalksmühle, 12.8.2021.** For precisely 88 years, the globally operating manufacturer of connectors and contact systems with in-house development, production and headquarters has been based in Schalksmühle in Germany's Sauerland region. Since then, well over 1,200 young people have completed training in a wide variety of professions at the third-generation family-owned company in Germany – and this year Lumberg welcomes six more new apprentices, four of them at the company's headquarters in Schalksmühle and two at its largest production factory in Cloppenburg.

At the headquarters in Schalksmühle, Maren Schlieck is starting her training as an industrial management assistant. Semih Aydogan and Berkant Yikilmaz decided to train as punching and forming technicians and are starting at Factory 1 in Everinghauserheide. As a tool mechanic apprentice, Fabio Dempewolf completes the Sauerland team.

Furthermore, Martin Schlotgauer is a newcomer on board at Plant 2 in Cloppenburg, Lower Saxony, and starts in the occupational profile of industrial mechanic, while Fabian Busche has chosen to train there as a mechatronics technician.

For a knowledgeable and sound professional future, the trainees will go through a regular rotation system to acquaint themselves with the different fields, departments and locations, in line with their respective occupational profile. They will familiarize themselves with relevant matters that relate to the products made by Lumberg and learn about working in different team structures as well as the flows of a modern industrial operation.

#### **About Lumberg Group:**

The Lumberg Group, headquartered in Schalksmühle, Germany, ranks among the leading providers of connector and interconnect systems. Core areas of expertise include R&D, manufacturing and the worldwide sales of electromechanical and mechatronic components. For 88 years now, the Group's skills have broadened from manufacturing connectors and challenging micro-contact elements, to developing complex mechatronic assemblies, to customer-specific engineering and technical design services for all industries. In-depth application expertise led to strong partnerships in the automotive, home appliance, building technology and communications industries. Family-run in the third generation, the company has a global workforce of around 1,200. Subsidiaries in Europe, America and Asia form a dense sales network. In 2020, the Group's turnover totaled some Euro 125,7 m. Over 20,000 catalog and customized products are proof of the company's efficiency.
